Space Resources: International Legal Frameworks

Ian Christensen
Director of Private Sector Programs
Secure World Foundation

Policy Building Blocks for Space Resources Development

9th Joint Meeting of the Space Resources Roundtable and the Planetary & Terrestrial Mining Sciences Symposium
Golden, CO
June 12, 2018
Secure World Foundation is a *private operating foundation* that promotes cooperative solutions for space sustainability

- **Why space sustainability?** Increasing reliance on space assets coupled with potentially destabilizing trends

- **Our mission:** To work with governments, industry, international organizations, and civil society to develop and promote ideas and actions to achieve the secure, sustainable, and peaceful uses of outer space benefiting Earth and all its peoples
Space Resources – Policy/Legal Discussions
Current Status

- Overarching legal context: the Outer Space Treaty (1967) – but a gap in the law relative to space resources
  - What is the meaning of “appropriation?” Of “use?”
  - How are benefits realized and shared?
  - What does “due regard for the interests of all states” mean?
- Emerging consensus that space resources utilization is not prohibited
- Domestic laws in place in US and Luxembourg.
  - Other countries (Japan, UAE?)
  - Are these laws sufficient and complete?
- What balance between domestic law and international law?
- UN Committee on Peaceful Uses of Outer Space (COPUOS) Legal Subcommittee likely to consider establishing a formal working group on the topic during its 2019 session.
Outer Space Treaty of 1967  
(105 State Parties)

• ARTICLE I: “Outer space, including the Moon and other celestial bodies, shall be free for exploration and use by all States…”

• ARTICLE II: “Outer space, including the Moon and other celestial bodies, is not subject to national appropriation by claim of sovereignty, by means of use or occupation, or by any other means.”

• ARTICLE VI: “The activities of non-governmental entities in outer space, including the Moon and other celestial bodies, shall require authorization and continuing supervision by the appropriate State Party to the Treaty.”

International law provides a framework under which all space activities are conducted but does not address space resources with any specificity.
Promoting Cooperative Solutions for Space Sustainability

9th SRR & PTMSS Joint Meeting
Golden, CO June 12, 2018

Policy Discussions – National Level

The need for regulation – to provide industry certainty and implement international obligations.

The role of policy – to provide a context for development.
The Hague International Space Resources Governance Working Group aims to build consensus on regulatory “concepts needed to enable, support and co-ordinate the use of space resources and be acceptable for space-faring nations and other interested states”

- Industry, government, and civil society participation from across the globe
- Based on the principle of adaptive governance

Coordination of principles at national and international level will help States establish the conditions under which socio-economic benefit might result from space resources development
Terms of Reference - Objectives

- Assess the need for a framework for space resource activities
- In case of need, to lay the groundwork for the definition of such a framework based on the UN Space Treaties
- The groundwork required will include the identification and formulation of building blocks for the governance of space resources with possible implementation of a relevant forum for the negotiations
- Following its conclusions the Working Group would like to encourage States to start negotiating a framework
Platform

The WG is hosted by a Consortium of organizations located in all continents:

- International Institute of Air and Space Law (Leiden University, The Netherlands)
- Secure World Foundation (USA)
- Nishimura Institute for Advanced Legal Studies (Japan)
- University of Luxembourg (Luxembourg)
- University of Cape Town (South Africa)
- Catholic University of Santos (Brazil)
- Centre for Resources, Energy and Environmental Law (University of Melbourne, Australia)
- Indonesian Centre for Air and Space Law (Padjajaran University, Indonesia)
- Ten to the Ninth Plus Foundation (USA)
Members
• Important stakeholders from government, industry, academia, research centres, space agencies, international organisations, and civil society.

Observers
• Professionals & academics directly involved in space resources issues

Technical Panel
• Purpose: identify technical challenges related to the use of space resources; advise the WG about current developments; assess the feasibility of the implementation of the building blocks

SocioEconomic Panel
• In the process of being established; to be similar in function to the technical panel
Draft Building Blocks for the Development of an International Framework on Space Resource Activities

As released in September 2017

1. Objective
2. Definition of key terms
3. Scope
4. Principles
5. International responsibility for space resource activities and jurisdiction over space products
6. Access to space resources
Draft Building Blocks (cont’d)

7. Utilization of space resources
8. Due regard for interests of all countries and humankind
9. Avoidance of harmful impacts resulting from space resource activities
10. Technical standards for prior review of, and safety zones around space resource activities
11. Monitoring and redressing harmful impacts resulting from space resource activities
12. Sharing of benefits arising out of the utilization of space resources
13. Registration and sharing of information
14. Provision of assistance in case of distress
15. Liability in case of damage resulting from space resource activities
16. Visits relating to space resource activities
17. Institutional arrangements
18. Settlement of disputes
19. Monitoring and review
Invitation to submit comments on the Draft Building Blocks

The preliminary result of the work of The Hague Space Resources Governance Working Group can be found at:

The Working Group invites any interested organisation or individual to submit comments and remarks on the text of the Building Blocks by 15 October 2018 to spaceresources@law.leidenuniv.nl or via this questionnaire.
